About Community

Basic Attention Token (BAT) is a revolutionary digital advertising and rewards platform from the inventor of JavaScript and co-founder of Mozilla & Firefox that rewards users in Ethereum-based BAT tokens for any ads they choose to see. BAT locally matches ads to users without any tracking or data collection required. Start earning and using BAT now with Brave browser.

2020 Fund Returns (closed to investors, this is not an advertisement for investment):

Long-term audited 2.41X or 140.63% return on ~100k AUM [outside capital]

(identical results for ~100k peak internal capital & ~5k effective AUM)

Short-term unaudited ~20X or 1,616.19% return on ~17k AUM [internal capital]

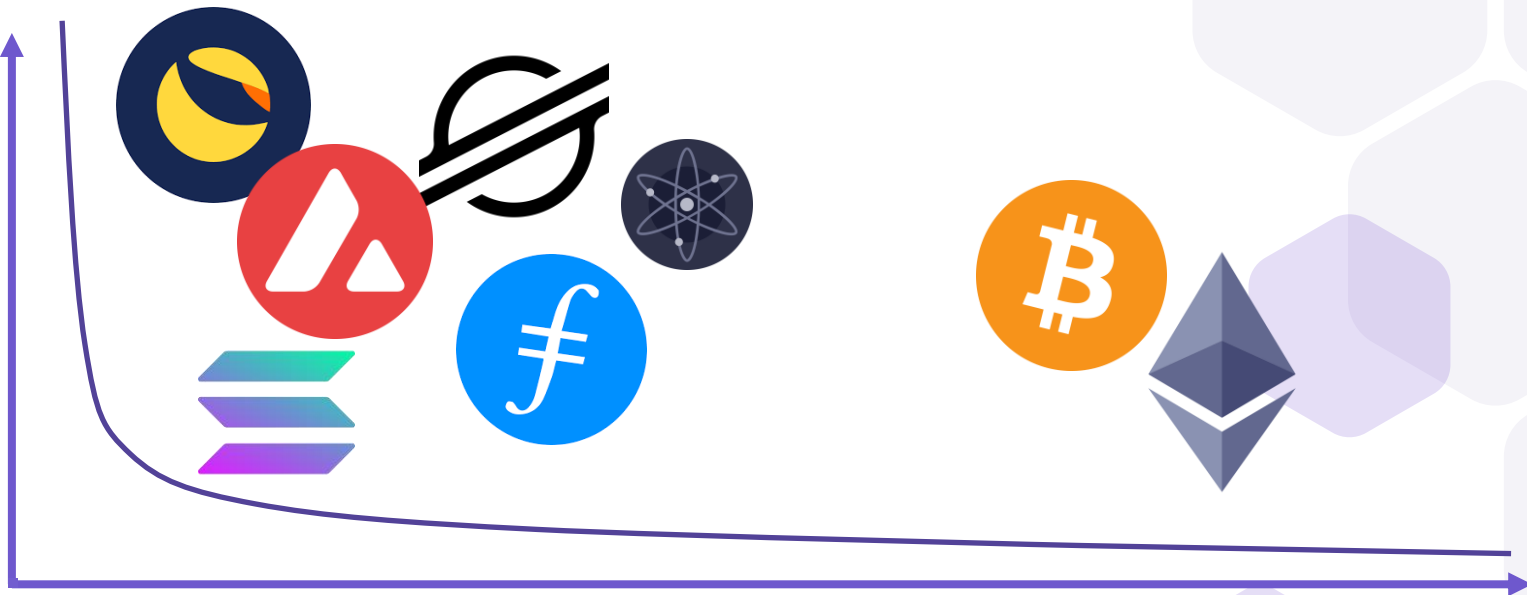

Learn how to effectively invest in stocks, options, bonds, treasuries, forex, funds, commodities, crypto, and more whether you want to day trade for income or invest for wealth with minimal downside. Uncover how to navigate today's markets and take control of your active and passive portfolio... all while minimizing your tax bill.

Inside you'll find hedge fund manager John Wooten's **actual playbook** used to short the 2020 market in February, bet against crude oil 3 weeks before it went negative, and exit Bitcoin at 40k after entering at 2k. Learn strategies that took thousands of trading hours and many more dollars to fully understand (and don't worry about the nonsense that doesn't work) so that you can grow your portfolio.
